VOL. 43 FEBRUARY 2003 NO. 1

NEW PERSPECTIVES ON THE ORIGIN OF METAZOAN COMPLEXITY

Organized by Ruth Ann Dewel and Julian P. S. Smith III

New perspectives on the origin of metazoan complexity: An introduction to the Symposium RUTH ANN DEWEL 1

The origin of metazoan complexity: Porifera as integrated animals WERNER E. G. MÜLLER 3

Developmental genes and the reconstruction of metazoan evolution—Implications of evolutionary loss, limits on inference of ancestry and type 2 errors DAVID K. JACOBS AND RUTH D. GATES 11

The significance of syncytial tissues for the position of the heaxactinellida in the Metazoa SALLY P. LEYS 19

Bridging morphological transitions to the Metazoa RUTH ANN DEWEL, MARY U. CONNELL, AND WILLIAM C. DEWEL 28

The significance of muscle cells for the origin of mesoderm in Bilateria REINHARD M. RIEGER AND PETER LADURNER 47

Epithelium—The primary building block for metazoan complexity SETH TYLER 55

On the reorganization of fitness during evolutionary transitions in individuality RICHARD E. MICHOD AND AURORA M. NEDELCU 64

Three puzzles in hierarchical evolution DANIEL W. MCSHEA AND MARK A. CHANGIZI 74

Developmental insights into the origin of complex colonial hydrozoans PAULYN CARTWRIGHT 82

Complexity generated by iteration of hierarchical modules in Bryozoa STEVEN J. HAGEMAN 87

Architectures of biological complexity JAMES W. VALENTINE 99

The Ediacaran biotas in space and time BEN WAGGONER 104

Anatomical information content in the Ediacaran fossils and their possible zoological affinities JERZY DZIK 114

THE CAMBRIAN EXPLOSION: PUTTING THE PIECES TOGETHER

Organized by Kevin J. Peterson and Graham E. Budd

A fungal analog for Newfoundland Ediacaran fossils? KEVIN J. PETERSON, BEN WAGGONER, AND JAMES W. HAGADORN 127

The segmented *Urbilateria*: A testable scenario GUILLAUME BALAVOINE AND ANDRÉ ADOUTTE 137

What can DNA tell us about the Cambrian explosion? LINDELL BROMHAM 148

The Cambrian fossil record and the origin of the phyla GRAHAM E. BUDD 157

Exceptional fossil preservation and the Cambrian explosion NICHOLAS J. BUTTERFIELD 166

The Ordovician radiation: A follow-up to the Cambrian explosion? MARY L. DROSSER AND SETH FINNEGAN 178

Trilobite tagmosis and body patterning from morphological and developmental perspectives NIGEL C. HUGHES 185

Unleashing the force of cladistics? Metazoan phylogenetics and hypothesis testing RONALD A. JENNER 207

The Proterozoic and earliest Cambrian trace fossil record; patterns, problems and perspectives SÖREN JENSEN 219

Taking the pulse of the Cambrian radiation BRUCE LIEBERMAN 229

THE PROMISE OF INTEGRATIVE BIOLOGY

Organized by Marvalee H. Wake and John S. Pearse

What is "Integrative Biology"? MARVALEE H. WAKE 239

Switch from asexual to sexual reproduction in the planarian *Dugesia ryukyuensis* MOTONORI HOSHI, KAZUYA KOBAYASHI, SACHIKO ARIOKA, SUMITAKA HASE, AND MIDORI MATSUMOTO 242

Seeking the ultimate and proximate causes of *Volvox* multicellularity and cellular differentiation DAVID L. KIRK 247

The squid-vibrio symbioses: From demes to genes JENNIFER R. KIMBELL AND MARGARET J. MCFALL-NGAI 254

Toward an integrative historical biogeography MICHAEL J. DONOGHUE AND BRIAN R. MOORE 261

Integrative biology and genetic resources management JEAN-CLAUDE MOUNOLOU, GUILLAUME QUENEY, GÉRARD BOLET, NICOLE DENNEBOUY, AND MONIQUE MONNEROT 271

The promise of integrative biology: Resurrection of the naturalist JOHN S. PEARSE 276

COMPARATIVE IMMUNOLOGY

Organized by Edwin L. Cooper

Comparative immunology EDWIN L. COOPER 278

Origin of the metazoan immune system: Identification of the molecules and their functions in sponges WERNER E. G. MÜLLER AND ISABEL M. MÜLLER 281

Origins and evolutionary relationships between the innate and adaptive arms of immune systems CHRISTOPHER J. BAYNE 293

The role of antimicrobial peptides in innate immunity TOMAS GANZ 300

Cellular receptors and signal transduction in molluscan hemocytes: Connections with the innate immune system of vertebrates JUDITH E. HUMPHRIES AND TIMOTHY P. YOSHINO 305

Natural peptide antibiotics from tunicates: Structures, functions, and potential uses ROBERT I. LEHRER, J. ANDREW TINCU, STEVEN W. TAYLOR, LORENZO P. MENZEL, AND ALAN J. WARING 313

Diverse lectin repertoires in tunicates mediate broad recognition and effector innate immune responses MICHAEL S. QUESENBERRY, HAFIZ AHMED, MARIA T. ELOLA, NUALA O'LEARY, AND GERARDO R. VASTA. ... 323

Novel immune-type receptor genes and the origins of adaptive and innate immune Recognition GARY W. LITMAN, JEFFREY A. YODER, JOHN P. CANNON, AND ROBERT N. HAIRE 331

Did the molecules of adaptive immunity evolve from the innate immune system? SIMONA BARTL, MEREDITH BAISH, IRVING L. WEISSMAN, AND MARILYN DIAZ 338

Rapid evolutionary emergence of the combinatorial recognition repertoire JOHN J. MARCHALONIS, G. KERR WHITFIELD, AND SAMUEL F. SCHLUTER 347

SELECTION AND EVOLUTION OF PERFORMANCE IN NATURE

Organized by Raymond B. Huey and Joel G. Kingsolver

Introduction: The evolution of morphology, performance, and fitness JOEL G. KINGSOLVER AND RAYMOND B. HUEY 361

Performance surfaces and adaptive landscapes STEVAN J. ARNOLD 367

Body size, performance and fitness in Galapagos marine iguanas MARTIN WIKELSKI AND L. MICHAEL ROMERO 376

Mutation accumulation, performance, fitness RAYMOND B. HUEY, GEORGE W. GILCHRIST, KIMORA WARD, LISA MAVES, DAVID PEPIN, AND DAVID HOULE 387

Measuring performance in nature: Implications for studies of fitness within populations DUNCAN J. IRSCHICK 396

Reciprocal selection at the phenotypic interface of coevolution E. D. BRODIE III AND B. J. RIDENHOUR 408

Physiological epistasis, ontogenetic conflict and natural selection on physiology and life history BARRY SINERVO AND RYAN CALSBEEK 419

Multi-trait selection, adaptation, and constraints on the evolution of burst swimming performance CAMERON K. GHALAMBOR, JEFFREY A. WALKER, AND DAVID N. REZNICK 431

Evolution of physiological tolerance and performance during freshwater invasions CAROL EUNMI LEE, JANE LOUISE REMFERT, AND GREGORY WILLIAM GELEMBIUK 439

Integrating development and environment to model reproductive performance in natural populations of an intertidal gastropod ROBERT D. PODOLSKY 450

The adaptive evolution of plasticity: Phytochrome-mediated shade avoidance responses JOHANNA SCHMITT, JOHN R. STINCHCOMBE, M. SHANE HERSCHEL, AND HEIDRUN HUBER 459

Environmental variation and selection on performance curves JOEL G. KINGSOLVER AND RICHARD GOMULKIEWICZ 470

COMPARATIVE AND INTEGRATIVE VISION RESEARCH

Organized by Mason Posner, Sönke Johnsen, and Todd Oakley

A comparative view of Alpha Crystallins: The contribution of comparative studies to understanding function MASON POSNER 481

Gene sharing, lens crystallins and speculations on an eye/ear evolutionary relationship JORAM PIATIGORSKY 492

Ancestral gene reconstruction and synthesis of ancient rhodopsins in the laboratory BELINDA S. W. CHANG 500

Evolution of insect eye development: First insights from fruit fly, grasshopper and flour beetle MARKUS FRIEDRICH 508

On homology of arthropod compound eyes TODD H. OAKLEY 522

To see or not to see: Evolution of eye degeneration in Mexican blind cavefish WILLIAM R. JEFFERY, ALLEN G. STRICKLER, AND YOSHIYUKI YAMAMOTO 531

Visual ecology and functional morphology of Cubozoa (Cnidaria) MELISSA M. COATES 542

Polarization vision and its role in biological signaling THOMAS W. CRONIN, NADAV SHASHAR, ROY L. CALDWELL, JUSTIN MARSHALL, ALEXANDER G. CHEROSKE, AND TSYR-HUEI CHIOU 549

Effects of light adaptation on the temporal resolution of deep-sea crustaceans TAMARA M. FRANK 559

Colour vision in diurnal and nocturnal hawkmoths ALMUT KELBER, ANNA BALKENIUS, AND ERIC J. WARRANT 571

Lifting the cloak of invisibility: The effects of changing optical conditions on pelagic crypsis SÖNKE JOHNSEN 580

A Fourier tool for the analysis of coherent light scattering by bio-optical nanostructures RICHARD O. PRUM AND RODOLFO H. TORRES 591

PHYSIOLOGY UNDERLYING PHENOTYPIC PLASTICITY AND POLYPHENISMS

Organized by John D. Hatle

Physiology underlying phenotypic plasticity and polyphenisms: Introduction to the symposium JOHN D. HATLE 605

The endocrine regulation of wing polymorphism in insects: State of the art, recent surprises, and future directions ANTHONY J. ZERA 607

Genotype to phenotype: Physiological control of trait size and scaling in insects DOUGLAS J. EMLEN AND CERISSE E. ALLEN 617

Plasticity and canalization in the control of reproduction in the lubber grasshopper JOHN D. HATLE, DAVID W. BORST, AND STEVEN A. JULIANO 635

Endocrine mechanisms underlying plasticity in metamorphic timing in spadefoot toads GRAHAM C. BOORSE AND ROBERT J. DENVER 646

Endocrine mediation of vertebrate male alternative reproductive tactics: The next generation of studies ROSEMARY KNAPP 658
